

CITY AND COUNTY OF SAN FRANCISCO

DEPARTMENT OF PUBLIC WORKS

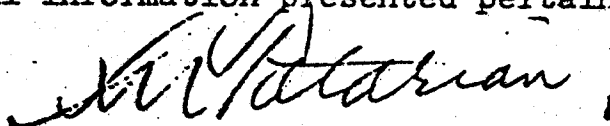

ORDER NO. 104,407 Date of Order: 03/03/76

Pursuant to the testimonies presented by the public and by the Department of Public Works Industrial Waste Staff at a public hearing on February 26, 1976, in Room 228, City Hall, the Director of Public Works hereby adopts the following provisions:

1. The characteristics of any industrial waste discharged into the sewerage system shall not exceed at any time, based upon any grab sample, a maximum of 5.0 mg/l of total chromium.
2. Prohibit, where practicable, the use of chromium containing compounds for corrosion treatment of water which may eventually be discharged into the sewerage system.
3. Require that all industries discharging significant amounts of heavy metals (viz., arsenic, cadmium, total chromium, copper, lead, mercury, nickel, silver, and zinc) complete, within a six-month period and where practicable, improvements in housekeeping and process that will minimize or eliminate the discharge of such heavy metals into the sewerage system.

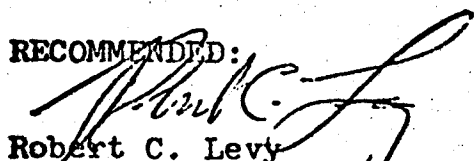

The basis for the action taken includes the following:

1. Section 118, and 123.16 of Article 4.1 of Chapter X, Part II, Section 1 of the San Francisco Municipal Code (Public Works Code).
2. The Director, in a public hearing on February 26, 1976, heard and considered all information presented pertaining to the Order.

S. M. Tatarian
Director of Public Works
